

## Dualism

What is consciousness?  
Is it the result of heightened cognitive function?  
Or maybe it is simply just an illusion  
A trick of the mind so to speak  
Who's to say we can't artificially program such a phenomena?  
That would be the ultimate achievement of mankind wouldn't it?  
To play god  
To create a sentience from wires and machinery  
What could go wrong?  
Who is to stop us?

I occupy, the space between  
Identify, what is not seen  
New digital, self-psychosis  
Screen rohypnol, glowing hypnosis  
Duality, slowly kills me
