

## **Breeders**

Who are we to say we have a right to bring life into existence?

How should we determine what requirements must be met?

Is sentience nothing more than a disease?

Does the human population create this sickness?

Should we all embrace extinction?

Hey Breeder

I've got something to say

Hey Breeder

The world's dying today

Hey Breeder

I've got a joke for you

Hey hey Breeder

Nobody died for you

In the end all you will ever be is just another dumb ape breeding more dumb apes
